

## Anti-Wash Geojute

## Biodegradable

## Erosion Matting

Belton Industries' signature 100% biodegradable erosion control jute product.

Intended for embankment stabilization, this fabric is easy to plant through and holds up to four times its weight in water. (Independent test data is available on request.)

GEOJUTE® is often utilized during major airport runway extensions since it promotes vegetation growth on grassy areas adjacent to runways.

### Features & Benefits

- 100% biodegradable woven jute blanket
  - Durability/Field experience: 1-2 years
  - Accepts seeding before or after installation of fabric
- 14.7 oz/sy roll size: 4' x 225'  
For use on slopes up to a 2:1 grade  
Plantings can be made through the fabric
