

Geocoir

Biodegradable

Geogrid

GEOCOIR® 700

Applications have been built around the installation of natural gas pipelines. When pipes are buried along or beneath waterways, the fabric is used to aid re-vegetation along stream beds and on river embankments.

Features & Benefits

- 100% biodegradable spun coir fabric
- Open-weave construction allows for hydro-seeding before installation
- For use on extreme slopes
- Long lasting (10+ years in Canada), where short growing seasons are not conducive to rapid establishment of vegetation
- Handles water flows of up to 10 feet per second
- 20.6 oz per square yard / 700 grams per square meter
- 50% open area
